eero **for Business**

Dobson
F I B E R

The wifi solution your business can rely on.

Business-grade wifi
Fast, reliable, and secure eero wifi with TrueMesh that reduces drop-offs and dead spots.

Reduce operational head
Easy to set-up and manage business networks, with access to eero support to help prevent network downtime

Branding opportunities
Curate custom experiences for visitors that will elevate your brand.

Added control
Support guest users without giving them unfettered access to the network.

Compliance included
Connected users will be able to click to accept T&C agreements, acceptable usage policies and privacy notices.

Always on
Local network stays up, even if the cloud goes down, to keep the business running.

Tools designed for businesses

The eero for Business program will include a new suite of management tools for businesses to manage and control their bundled eero devices.

Multiple SSIDs
Enable up to four SSIDs to securely segment your network.

- Cordon off business critical devices for added security.
- Keep the local network running, even if cloud-access ges down.
- Set access time limits and bandwidth caps by segments.

Captive Portal
Create a customized wifi experience for visitors.

- Define connection times and bandwidth limits for additional control.
- Create customized splash pages to build your brand.
